VENTUZ CHINA OPENS SECOND OFFICE IN SHANGHAI

After two years of successfully establishing Ventuz as a go-to solution for real-time graphics in the region, Ventuz China is expanding its ventures by opening a second office. With locations in Beijing and Shanghai, Ventuz China now covers the country's most important media strongholds.

Since 2014, Ventuz China has completed many classic projects both in the broadcast as well as the event industries. As a holistic real-time on-air graphic visualization software, Ventuz has served CCTV, SMG, BTV, HeNan TV, Mercedes, Audi, BMW and many more. The interaction and visualization solution Ventuz is now widely applied in theme parks, intelligent showrooms, events and exhibition shows.

"Shanghai, as the free trade zone in China and the country's cultural and creative capital, has a huge demand for creative design and interaction", said Halley Han, CEO of Ventuz China. "Establishing an office of Ventuz China in

Shanghai helps us to increase our presence in the market and boost sales as well as customer service activities."

Ventuz Technology now counts six locations across the globe with the two offices in China as well as Munich and Hamburg in Germany, Dubai, and New York. "We are proud to know that Ventuz is being so well received in China", said Erik Beaumont, CEO of Ventuz Technology. "Ventuz China is representing the software more than well and we are grateful for this fruitful partnership." The Shanghai office is located in Building No. A, YingJia Plaza, Minhang District, phone number +86-21-54736682.
